

**Title: deegree 3 status report**

**Authors: Markus Schneider, Rutger Bezema**

**Affiliation: lat/lon GmbH**

**Keywords: -**

deegree 3 is a complete rewrite of the deegree geospatial library and the deegree OGC service implementations. Development goals are easy configuration, performance, scalability and modularity. This presentation gives an overview of the basic architecture, current development status and the OGC services that are already available.
