Betreff **[Incubator] Motion accepted** 23.01.2010 05:06

An Jody Garnett <jody.garnett@gmail.com> ☆

CC OSGeo-incubator ☆

The motion is accepted.

On 14/01/2010, at 10:17 AM, Jody Garnett wrote:

Motion: The Incubation Committee recommends the deegree project for graduation from incubation with Markus Schneider as the officer responsible for the project (OSGeo VP, deegree).

The incubation status documents are available at:

- http://wiki.osgeo.org/wiki/Deegree_Incubation_Status
- <http://wiki.deegree.org/deegreeWiki/OSGeoIncubation>

I will start the voting with:

+1 jgarnett

+1 Markus Lupp
+1 Paul Spencer
+1 Jorge Gaspar Sanz Salinas
+1 Arnulf Christl
+1 Julien-Samauel Lacroix
+1 Steve Lime
+1 Cameron Shorter
+1 Frank Warmerdam
+0 Judit Mays
+0 Markus Schneider

With this motion being accepted we will need to recommend deegree for graduation to the OSGeo board.

Jody

Releases

- deegree 2.3 RC 1 in November 2009
- deegree 2.3 stable in April 2010 (after 3 RC's)
- iGeoDesktop 0.3.4 in June 2010
- deegree 2.4 RC 1 in July 2010
- deegree 2.4 stable in November 2010
- deegree 3.0 stable in November 2010

Other news

- Twitter channel @deegree_org opened in April 2010
> 135 tweets until today
- Ongoing improvements in the Wiki
- Build process completely renewed in deegree 3:
 - Based on Maven
 - Uses Artifactory and FindBugs
 - Includes automated OGC CITE tests
- Weekly developer meetings (and meeting notes)

Some Figures

- SVN committers: ~ 25 (17)
- Users list members: 307 (228)
- Developer list members: 198 (153)
- Wiki pages: >700 (>500)
- Wiki users: 76 (~ 50)
- Java code lines: 575 k (v. 2), 350 (v. 3)
- Estimated effort (person years): 97 (v. 2), 72 v. 3)

Betreff **[deegree-users] Stepping down of the deegree PSC**

09.02.2010 05:15

Antwort an deegree-users@lists.sourceforge.net 

An deegree-devel@lists.sourceforge.net , **mehr**

Dear friends of deegree [as usual sorry 4 cross-posting...],

first of all congratulations to all of us to the successfull completion of the OSGeo Incubation process. I think this is an important step for deegree towards becoming a transparent and internationally recognized FOSS-project.

For over a year my contribution to the PSC was quite limited as my professional career took a direction that led away from standardized Spatial Data Infrastructures and Open Source GIS. Well, my new job keeps me pretty busy and I lack the time (and sometimes the Internet connection...) to keep myself up to date in regard to deegree. I guess this makes me a rather bad member of the PSC and because of this I want to finally step down from the PSC. The finishing of the incubation seems to be a nice point in time to do this as I was very keen that deegree would become an OSGeo project and so I am very pleased that finally we had success in this regard.

Well, I certainly wish the deegree project a good and successfull future and will surely keep my eyes open about developments to come.

Markus

Outlook for 2011

- deegree 3.1 release early 2011: includes Oracle support, data access and CRS subsystem improvements
- deegree 3.2 late summer: first API subsystems stable (CRS, Geometry, Feature)
- Develop deegree 3 geoportal framework and security subsystem
- Spread new deegree-based solutions: inspireNode, xplanNode, aaaNode
- Initiate a Cloud project

Questions? Discussion...
